

Search within an Outbreak

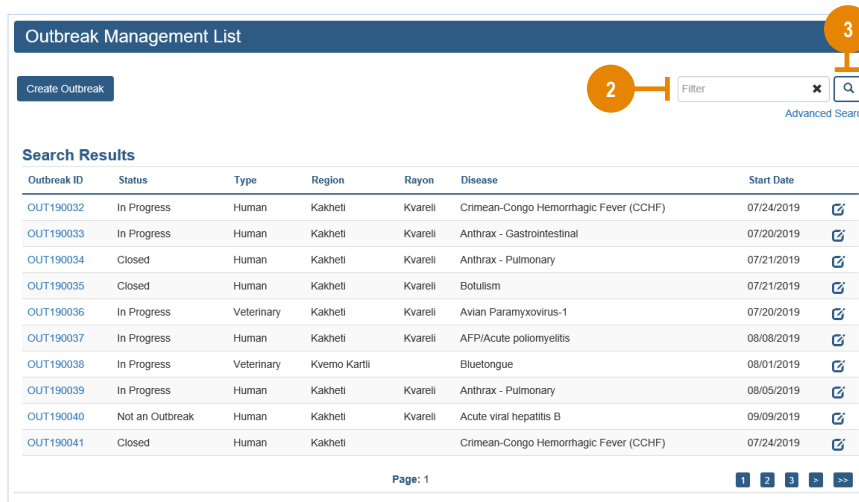

Pg. 1 of 2

An EIDSS user with the appropriate permissions can locate outbreak sessions, cases, and contacts in the database. This quick guide presents the steps to search the Outbreak module.

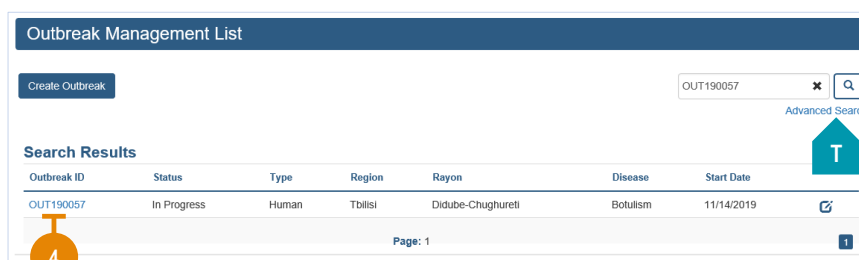

- From the **EIDSS Dashboard**, choose **OUTBREAK** from the **OUTBREAK** drop-down menu. The **Outbreak Management List** screen appears.

- Enter the **Outbreak ID** for the session you wish to locate. **Note:** Information matching any of the column headings in the list of outbreak sessions can be used to search. **Note:** A session must be chosen prior to searching for cases and contacts within that session.

Tip: If the desired session does not appear, click **Advanced Search**, enter as much information as possible in the **Search Outbreak** screen that appears, and click **Search**.

- Click the **Outbreak ID** corresponding to the desired session. The **Outbreak Session** screen appears with the **CASES** tab open.
