

Enter a Test Result

Pg. 1 of 1

An EIDSS user with the appropriate permissions can add results to samples in the database. This quick guide presents the steps to enter a test result.

- From the **EIDSS Dashboard**, choose **TESTING** from the **LABORATORY** drop-down menu. The **Laboratory** screen appears with the **TESTING** tab open.

- Enter a search parameter for the sample for which you wish to enter a test result. **Note:** Searching may not be necessary if the desired sample appears in the grid.

- Click the **Search** icon. The **Laboratory** screen refreshes displaying the **Search Results**.

Tip: If the desired sample does not appear, click **Advanced Search**, enter as much information as possible, and click **Search**.

- Choose the appropriate **Test Result** from the drop-down menu corresponding to the desired sample. The **Laboratory** screen refreshes with the modified sample bolded and the **Save** button enabled.

- Click **Save**. A pop-up appears confirming successful entry of the result.
