

Delete an Avian Disease Report

Pg. 1 of 3

An EIDSS user with the appropriate permissions can remove reports from the database. This quick guide presents the steps to delete an avian disease report.

- From the **EIDSS Dashboard**, choose **AVIAN REPORT** from the **VETERINARY** drop-down menu. The **Avian Disease Report** screen appears. **Note:** Any disease report attached to an existing outbreak record cannot be deleted. **Note:** Interpretations, test results, penside tests, samples, species, and flock records attached to the disease report must be removed in the correct order before the report can be deleted.

- Enter as much information as possible about the disease report you wish to delete. **Note:** Fields marked with a red asterisk are mandatory. **Note:** Partial entry is acceptable for the **Report ID**.

Tip 1: To navigate to the desired date, click a **Calendar** icon and then the **Select Month > Select Year > Select Decade** bars at the top of the calendar.

Tip 2: To return to the previous screen without saving entered information, click **Cancel**.

Tip 3: To delete entered information, click **Clear**.

Tip 4: To further filter a search, click the **Show/Hide** icon next to **Advanced Search**, enter as much information as possible, and click **Search**.

The screenshot shows the Avian Disease Report search criteria form. The form includes fields for Report ID, Species Type, Disease, Report Status, Report Type, Region, Rayon, Settlement Type, Settlement, Date Entered From, Date Entered To, and Case Classification. The form is divided into Search Criteria and Advanced Search sections. The Search Criteria section is highlighted with a red box and the number 2. The Advanced Search section is highlighted with a red box and the number 3. The form also includes buttons for Cancel, Clear, and Search. The Case Classification field is set to T1. The Date Entered From field is set to 4/17/2019 and the Date Entered To field is set to 5/1/2019. The Report ID field is empty. The Species Type field is set to Avian. The Disease field is empty. The Report Status field is empty. The Report Type field is empty. The Region field is empty. The Rayon field is empty. The Settlement Type field is empty. The Settlement field is empty. The Case Classification field is set to T1. The form also includes a table of users and their roles.

- Click **Search**. The **Search Results** appear.

Delete an Avian Disease Report

Pg. 3 of 3

6. Click **Yes**. The disease report is deleted from the database. **Note:** Samples and tests associated with the disease report will remain in the database attached to the farm record, and any associated active surveillance campaigns or sessions will not be deleted from the database.

The screenshot shows a web application interface with a table and a modal dialog box. The table has columns labeled 'Species', 'Name', 'Status', 'Date', and 'Result/Observation'. Overlaid on the table is a yellow 'EIDSS Warning Message' dialog box. The dialog box contains the text 'Are you sure you want to delete this record?' and two buttons labeled 'Yes' and 'No'. A red circle with the number '6' is positioned over the 'Yes' button, indicating the step to be taken.
