

Create an Influenza-Like Illness Aberration Analysis Report Pg. 1 of 1

An EIDSS user with the appropriate permissions can create reports to detect deviations in notifiable disease incidences entered in the database. This quick guide presents the steps to create an influenza-like illness (ILI) aberration analysis report.

1. From the **EIDSS Dashboard**, choose **ILI ABERRATION ANALYSIS** from the **HUMAN** drop-down menu. The **ILI Aberration Analysis Report** screen appears.

2. Complete the parameters section. **Note:** Only ILI data from forms that fall within full weeks of the entered date range are included will be included in the analysis.

Tip: To navigate to the desired date, click a **Calendar** icon and then the **Select Month > Select Year > Select Decade** bars at the top of the calendar.

The screenshot shows the 'ILI Aberration Analysis Report' form. The parameters section is filled with the following values: Lang ID: English, End Date: 2/18/2020, Region: All, Time Units: Week, Lag: 1, Hospital: Chocoma Regional Hospital, Start Date: 5/1/2019, Region: All, Threshold: 2.5, Baseline: 4, Group Age: >= 65 Years. A red circle with a '2' is next to the parameters section, and a red circle with a '3' is next to the 'View Report' button.

3. Click **View Report**. The screen refreshes displaying the analysis results.
